NORDIC AGRICULTURE.

Can community and participatory gardening projects contribute to the development of a new sustainable food system in Nunavik?

Annie LAMALICE, Ellen AVARD, Véronique COXAM, Caroline DESBIENS, Thora HERRMANN, Yohann WITTRANT, Sylie BLANGY

Context: a global subsistence crisis...

In the world:

- Coexistence of food insecurity and overweight
- Impact of climate change
- Waste of food

...With repercussions in the North

In the Canadian Arctic:

- Westernization of the diet
- High cost of living
- Climate change and environmental pollution

Véronique Coxam, 2016

Véronique Coxam, 2016

Context: food security in Nunavik

Physical, social and economic access to healthy food

Food and nutritional security (CSA, 2012)

In sufficient quantity and quality to meet both energy needs and food preferences

Environment with adequate health system and sanitation

WAKEFIELD, S., FREDRICKSON K.R.and BROWN, T. (2015) Food security and health in Canada: Imaginaries, exclusions and possibilities, *The Canadian Geographer/Le Géographe canadien*, 59(1): 82-92.

Context: Cutural food security in Nunavik

Physical, social and economic access to healthy food

Cultural dimension of food security

(Power, 2008)

Food and nutritional security (CSA, 2012)

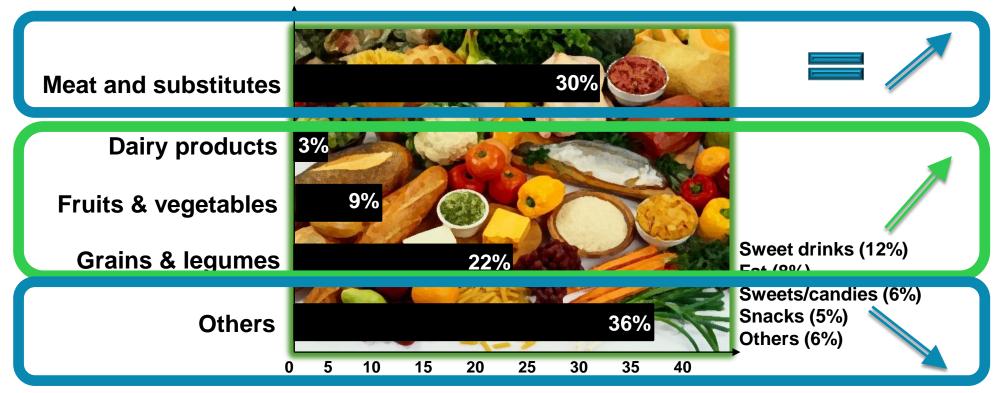

In sufficient quantity and quality to meet both energy needs and food preferences

Environment with adequate health system and sanitation

- Transmission of cultural values, skills and spirituality.
- Knowledge about traditionnal food
- Access to traditional food systems

Recommendations towards a better food security

Deficiencies:

Vitamins: A, B3, B6, C, D

Minerals: Calcium, Magnesium

Fibres

Blanchet et al., 2008 Institut National de Santé Publique du Québec Nunavik Régional Board of Health ans Social Services Régie Régionale de la Santé et des Services Sociaux du Nunavik

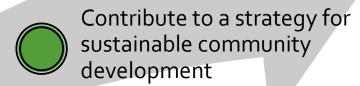

Objectives of the project

- Improve the nutritional quality of food
- Increase the availability of fresh local products

Improve the health and wellbeing of the population

Didier Haillot, 2016

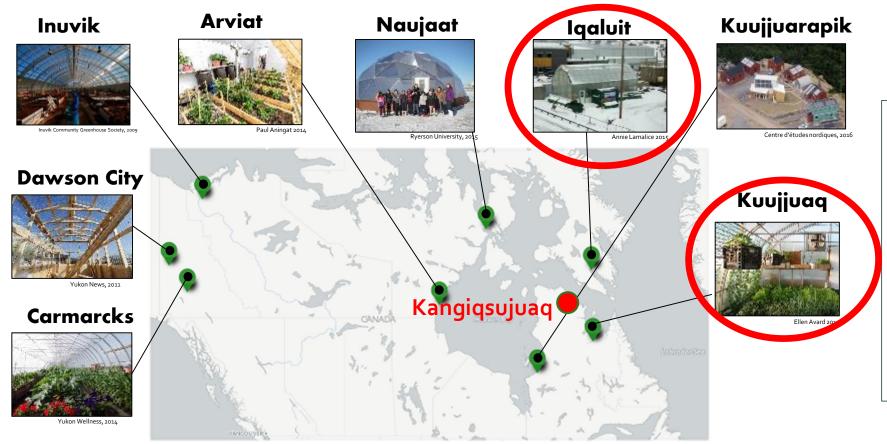

Davidee Nulukie and Marc-André Lamontagne, 2016

Greenhouses in the Canadian North

Community greenhouses

Ex. Kuujjuaq, Iqaluit, Inuvik...

Commercial activities

Ex. Dawson City, Inuvik

Research activities

Ex. Kuujjuarapik

Annie Lamalice, 2016

A new project aligned with previous research

Ellen Avard's thesis

2009-2010

- -Horticultural micro-projects in Kuujjuaq
- -Social acceptability of gardening and greenhouse projects in Nunavik

Didier Haillot, 2016

OHMI-Nunavik project

2015-2019

-New research project in Kuujjuaq and Kangiqsujuaq

Ellen Avard, 2013

-Construction of a second community greenhouse in Kuujjuaq

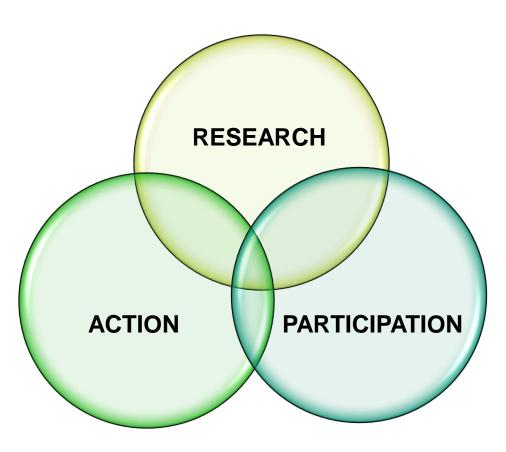

An interdisciplinary participatory action research

Interdisciplinarity

- Geography of health
- Ethnobotany
- Nutrition
- Mechanical engineering
- Thermodynamics

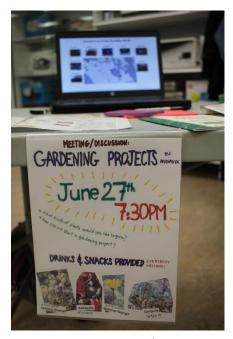

Local partners

- Gardeners and volunteers
- Childcare centers
- Supervised appartments
- Municipal administration of Kangiqsujuaq
- Makivik Research Center
- Nunavik Regional Board of Health and Social Services

An interdisciplinary participatory action research

Annie Lamalice, 2016

Annie Lamalice, 2016

Véronique Coxam, 2016

Véronique Coxam, 2016

Didier Haillot, 2016

Annie Lamalice, 2016

The three dimensions of the project

1-Technical and organizational challenges

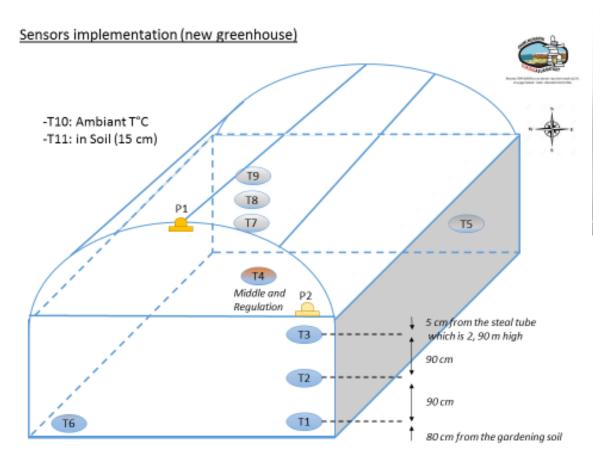

2-Ethnobotany

3-Nutrition and health

1-Technical and organizational challenges: managing energy

Didier Haillot 2016

Pictures: Didier Haillot 2016

1-Technical and organizational challenges: the soil

 The possibility to use local soil for gardening

The compost project

Hydroponic cultivation

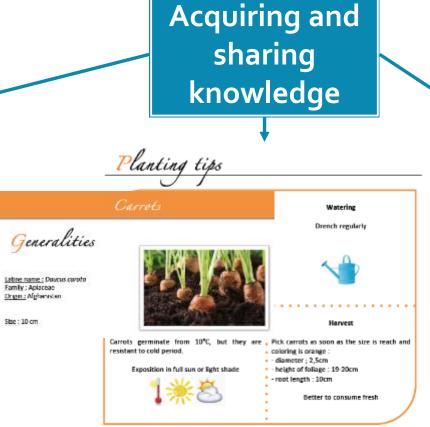

Annie Lamalice, 2016

1-Technical and organizational challenges: acquiring knowledge

Involve the children

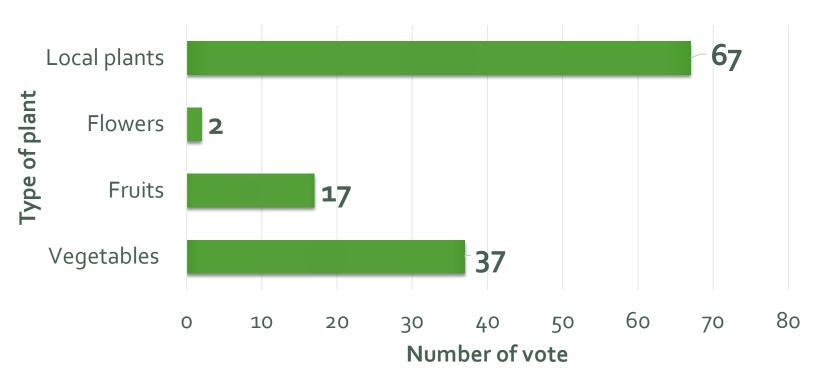

Create a Web platform to share information

Co-produce documentation

2-Ethnobotany

Which type of plants would the population of Kangiqsujuaq like to grow?

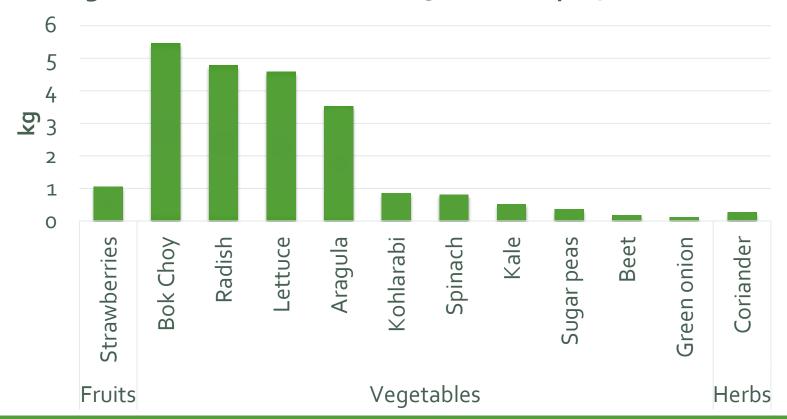

Hélène Draper, 2016

3-Nutrition and health

Type and weight of the crops in Kuujjuaq's greenhouse between June 25th and July 24th 2016

Hélène Draper, 2016

3-Nutrition and health

"Gardening is fun!"

"Relaxing"

"Contact with nature "

"Good vegetables"

" Fresh vegetables "

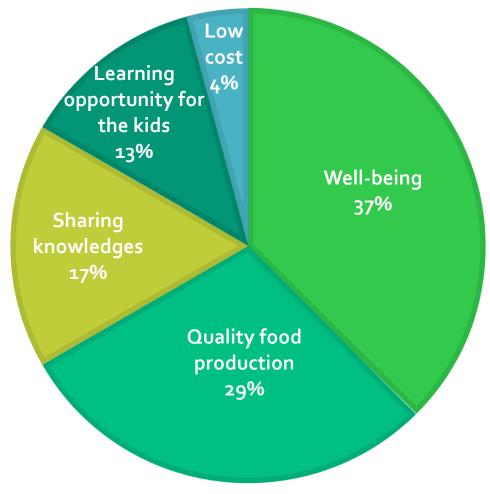

"Organic vegetables"

"Sharing knowledge"

"Learning opportunity for kids"

"Low cost"

Benefits of a greenhouse project according to Kuujjuaq's gardeners, June 2016

3-Nutrition and health

"We like fresh things"

"Wouldn't cost a lot of money"

" No need to ship the food" " Fresh fruits, vegetables and local plants"

"Veggies and fruits are too expensive"

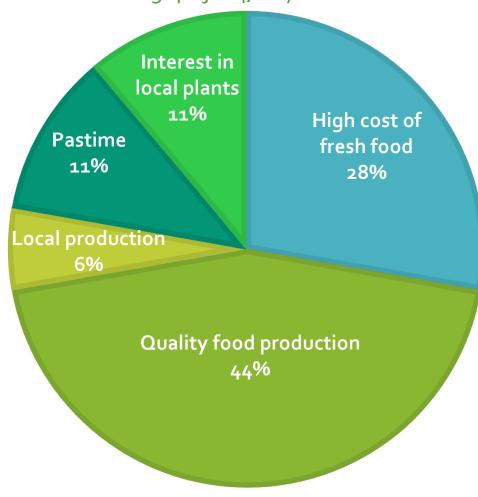

" It's nice to grow flower"

" fresh-fresh veggies and fruits"

"To save some money"

"I like local plants"

Interest for a greenhouse project in Kangiqsujuaq, July 2016

Acknowledgement

Research partners in Nunavik: Davidee Nulukie– Marc-André Lamontagne and all the gardeners of Kuujjuaq –The Tumiapiit Child care center - The NV of Kangiqsujuaq – Northern Villages of Kuujjuaq and Kangiqsujuaq – Nunavik research center (Makivik Corporation)
